

## Energy drinks

Manufacturer releases 37 products under 14 brands

Quality check of beverages takes place in a special licensed laboratory at all stages of the production.

The certified integrated system of quality and safety management of food products developed in accordance with two international standards — ISO 9001 and ISO 22000 is also in place at the factory.

NON STOP™ – energy drink cocktail for active people

The main difference of NON STOP™ from other energy drinks is in its new, improved formula. This drink differs from other energy cocktails by the increased content of caffeine and taurine. These natural stimulants provide a quick burst of energy, and a powerful vitamin complex (C, B5, B6, B9, PP) that helps compensate the lack of these substances in the body.

PIT BULL™ – energy drink with caffeine, taurine and natural juices

High-carbonated energy drink PIT BULL™ with caffeine, taurine and natural juices attracts customers not only by high content of CO<sub>2</sub>, original taste and powerful vitamin complexes (B5, B6, B9, PP, C), but also by stylish packaging and reasonable price.

SHAKE™ – non-alcohol carbonated cocktail

This cocktail with a whole range of bright, unforgettable flavors is created for modern, energetic consumers who strive to receive maximum pleasure from life. SHAKE™ is a drink for all who like concerts, parties, fashion parades, and bright shows.

GREEN ENERGY™ – energy drink with cannabis seed extract

A fundamentally new energy drink, Green Energy™, provides an energy boost, makes it easier to stand stress, anxiety and bad mood. The unique combination of natural extracts of cannabis seeds, caffeine, taurine and B-vitamins helps the body to absorb glucose, providing natural physical and emotional tonus. Beverages containing useful cannabis are a growing trend in the United States and Western Europe among adherents of healthy and active lifestyle
